

Hi all,

Please post a comment protesting the Update to General Plan regarding community centers. The update now limits community centers to only 1 per 35,000 residents. That is, only 2 community centers for a built-out North Natomas . Please object to this new measure for community centers, especially as it applies to North Natomas . Today is the last day for comments to General Plan working group.

The City plans to have the update to the General Plan supercede all neighborhood's community and/or financing plans. Please understand that the current North Natomas Community Plan and North Natomas Finance Plan says North and West Natomas needs 4 community centers. So this is a backhanded way to limit City's obligation to North Natomas residents. Further, there is no rationale listed why the City is saying why 1 community center fulfills needs for 35,000 residents. There is not even a bad rationale listed; there is no explanation. The new measurement is still part of the update to the General Plan even though Councilman Ray T. assured North Natomas residents that all 4 community centers will remain promised to North Natomas residents. He said this as late as a Saturday, June 28th meeting to North Natomas residents.

So please write the comment and email it to the General Plan comments website and please cc Councilman Tretheway's office please.

Thanks,  
Rosemarie Ruggieri  
Natomas Park resident
